

QUASAR KIT # 4037 – Audio Board

Ideal for adding sound to any CCTV camera set-up. Can also be used for home security, baby monitoring, surveillance or as a toy. Pre-built board comprises a highly sensitive electret microphone together with low-noise amplifier section. Industry standard 1V pk-pk output signal into a 47K load, for connection direct to a standard TV or VCR. Very small size makes it ideal for covert use. Simple 3 or 4-wire installation depending on model

supplied.

Technical Information

Average Pick up area	5 metre
Operating Voltage	12V dc supply
Red Wire	+12V dc
Black Wire	0V supply
Blue Wire	Audio Output (1V pk-pk)
Yellow Wire (where fitted)	Audio GND
Dimensions	22Wx 25Hx10Dmm

Installation

This board required just 3 or 4 simple connections depending on the version supplied. You can remove the Yellow wire from the 4-wire boards and use the black wire as common ground for both power supply and audio output.

Audio output can be taken direct to a standard TV or VCR. Alternatively, connect to one of our small audio amplifier boards (e.g. 3017 or 3027)
